

ECASI TRAINING PROFILE

ABOUT OUR TRAININGS

ECAS Institute has earned a strong reputation for offering professional capacity development, coaching, and consulting services both in Kenya and internationally. Our learning programs are designed to prepare individuals and organizations to effectively respond to ongoing challenges affecting institutions and communities.

We train personnel and professionals in areas such as Climate Change, Environment, Agriculture, Energy, and Water across Kenya and the African region. With the necessary infrastructure, skilled manpower, and partnerships with local, regional, and international institutions, we are able to organize and deliver both regular and tailor-made training courses based on client needs. These are offered in English, Swahili, French, and German.

Our courses are guided by a competency-based training approach and informed by regular syllabus reviews to ensure they remain current with emerging technological changes and market trends. In collaboration with our partners, we also offer free or subsidized trainings to expand access to environmental, energy, and climate knowledge.

Upon completion, participants are equipped with the skills needed to build climate resilience and advocate for climate action within their organizations and networks. They are also able to engage effectively with key stakeholders. Certificates are issued to those who successfully complete the training. ECAS is registered and recognized by the National Industrial Training Authority (NITA) as an official training provider and levy contributor.

OUR VISION & MISSION

Vision

A world-class center of excellence in training, coaching, research, and consulting working towards a healthy environment, thriving businesses, and resilient communities.

Mission

We take pride in being a Pan-African think-tank that is working to expedite training, research, and advisory services to inform decision-making for sustainable development

Client Testimonials

Beryl Omolo
– Konza Technopolis Authority

It's my first training and coming in I had so many expectations about knowing where these carbon markets are, is carbon markets really a thing. Coming from a background of construction and infrastructure, and being in the position of implementing a smart sustainable city, What I have learnt is very important and going back to the office I'll be able to make an impact with the information.

Clifford Siocha -
Senior environmentalist, KETRACO

I'm quite delighted to be among the participants of the training on carbon markets as offered by NETFUND in collaboration with ECAS. There has been quite a lot of grey areas when it comes to carbon markets not just within our institution but even externally and therefore I and my colleagues were quite excited to be part of the team. We got to realize about the opportunity to train through an invitation letter sent to us.

Yasuko Inoue
– Projects expert, JICA

I really thank the organizers of this training that is NETFUND and ECAS. There's a lot of people who are interested in carbon markets and we are learning with each other, as we interact with various people who are very passionate about the opportunities that are becoming more and more in Kenya.

Robert Ayaga
– Electrical Engineer, KETRACO

I was fortunate to be nominated for this training on carbon credits and carbon markets by NETFUND. My experience in this workshop, actually I was very green, I had some slight information and from the training I realized that my information was quite minimal especially when it comes to carbon markets. I really appreciate this training. I intend to take this to KETRACO where I want to take advantage of our credit points. I appreciate this opportunity and I believe that we are going to keep in touch.

Frequently Asked Questions

What kind of training do you offer?

We offer Professional training in management skills, technical training, energy management training, natural resources management, Sales and Customer care skills and other specialized areas. ✓✓

Are you registered under the National Industrial Training Authority?

Yes, we are. ✓✓

Who delivers the training courses?

Our training team is composed of well qualified trainers with over 10 years industry experience and a proven track record of delivering training to organizations in the private, public and NGO sectors. ✓✓

When do the training courses take place?

All our courses take place throughout the year as either Open House or In House respectively. See our course schedule in the course catalogue. ✓✓

Where are the training courses delivered?

Venues are dependent on the type of training. Trainings can be done at simulation facilities, on factory site or as an open house. In house training can be delivered at one's facility/country or in public facilities such as hotels, whichever is more convenient for you. ✓✓

Do I get a certificate after the training?

Yes, you get a Certificate of Participation ✓✓

Can the course be tailored to my requirements?

Absolutely, all our training courses can be customized in consultation with the trainees/participants. In addition, we can also combine elements of different workshops to create own unique course. ✓✓

Do you only deliver the courses in the catalogue?

No, we work in many diverse fields. If you don't see the trainings you have in mind in this catalogue, please inquire as there is a good chance that we can quickly find with the materials and expertise to deliver. ✓✓

How many participants can be in one group?

We have a maximum of 40 in one group for open house, no minimum. This is to ensure maximum interaction with the trainer. ✓✓
