

ECAS INSTITUTE PROFILE

www.ecasiafrica.org

OUR BIG IDEA

The ECAS Institute is an NGO registered in Nairobi, Kenya, under the NGOs ACT of 2015. We design and deliver training, research, policy, advocacy programs and consulting services. We provide practical experience, technical expertise, and policy advice on climate adaptation, climate finance, circular economy, sustainable energy, climate-smart agriculture, sustainable forest management, nature-based solutions, and sustainability.

As a leading think tank based in Nairobi, Kenya, we specialize in providing tailored solutions that empower organizations to navigate the complexities of environment, energy, and climate change and help our partners to increase the ability to respond effectively.

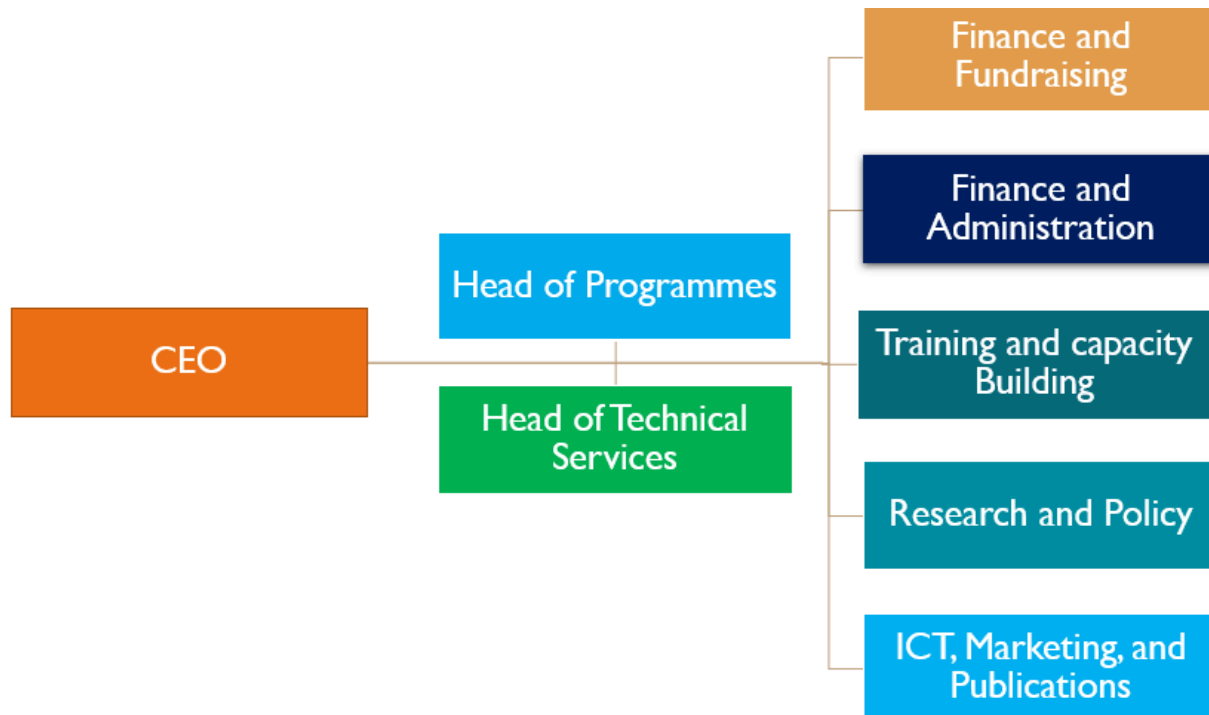

We work across the African region. We have implemented assignments and activities in Kenya, Tanzania, Uganda, South Sudan, Somalia, Malawi, Rwanda, Congo, The Gambia, and South Africa. Globally, we have supported our partners from the UK, Denmark, Italy, Sweden, Germany, and USA.

For more than 6 years, we have delivered high-quality services and programs that address: DATA GAPS, SKILLS GAPS, CAPACITY GAPS, AND POLICY GAPS in the fields of Natural Resources, Climate Change, Energy, Careers, Leadership, and Sustainability.

We remain your trusted research, training, and consulting green partner..

OUR STRUCTURE

THEMATIC AREAS

CLIMATE CHANGE

We strengthen the nexus between research, policy, and practice by undertaking independent climate change research and regular briefings from experts to policymakers and practitioners.

AIR QUALITY

We support projects and programmes through our expertise in consultancy, advocacy, and Policy advisory to reduce air pollution and carbon emissions by 30% by 2030.

ENERGY TRANSITIONS

We analyze the implications of technological innovations, markets, and regulatory frameworks on energy transitions and waste, and what it means for governments, the private sector, and communities

CIRCULAR AND GREEN ECONOMY

By investing in a circular and green economy, companies can 'leapfrog' in digital and materials innovation to embed ESG, low-carbon development, sustainable production, and consumption at the heart of their businesses

AGRICULTURE & FOOD SYSTEMS

We examine the changing nature of farming and food production, the food trade, risks in the supply chain, and the impact of diet on climate change.

NATURAL RESOURCES

We undertake and collaborate in research that analyzes options for the sustainable management of forests, wildlife, water, and land and how to use them in a way that enhances their resilience.

Problems We Address

Green Skills gaps

Our mentorship programs equip emerging leaders and professionals with practical skills and insights in sustainability and clean energy.

Policy Gaps

Climate action is held back by weak policies, poor enforcement, and lack of coordination.

We close these gaps through research, policy advice, and training driving stronger, more sustainable solutions.

Data Gaps

Effective climate action needs strong data, but gaps in research and tracking slow progress.

ECAS improves data systems to enable informed, impactful sustainability decisions.

Capacity Building Gaps

Achieving sustainability needs strong skills and institutions, yet many lack the expertise to drive impact.

ECAS bridges this gap through training, mentorship, and capacity building in climate, energy, and environmental governance.

TRAININGS AND CAPACITY BUILDING

We offer short courses and tailor-made training to communities, project teams, and professionals in Kenya and across Africa. We offer regular courses and tailor-made courses depending on the training needs. Courses can be offered in Swahili, English, French, or German.

The Institute conducts regular syllabus reviews for all its courses to ensure that they remain relevant and also embrace emerging technological changes and advancements. We employ the competency-based training approach guided by pre- and post-course evaluation and market demands.

We offer technical, knowledge, and green skills-based courses covering climate change, policy, finance, sustainability, governance, technology and research, projects, and human resource development and mentorship among other specialized areas.

TARGET AUDIENCE

ECAS Institute's training programs are tailored to meet the diverse needs of individuals and institutions working across the environment, energy, water, and climate sectors. We serve participants at various levels from grassroots practitioners to high-level policymakers ensuring that each training is context-relevant, impactful, and inclusive. Whether you are seeking to build technical capacity, strengthen institutional frameworks, or drive sustainable change, our programs are designed to support your goals.

- Local, County, national government officials
- Private Sector/SMEs/Businesses
- Media and Young Researchers
- Established professionals
- Youths and Job Seekers
- CSO and NGO representatives.
- Community and farmer representatives dealing with relevant matters.

TRAINING METHODOLOGY

- 01 Competency-based curricula aligned with market needs
- 02 Interactive formats including case studies, group work, and simulations
- 03 Blended learning options
- 04 Regular syllabus updates to incorporate emerging trends and technological changes
- 05 Post-training evaluations to ensure continuous improvement
- 06 Expert facilitators and trainers with real-world experience
- 07 Peer learning and networking

CAPACITY BUILDING FOR CLIMATE CHANGE

At ECAS Institute, we believe that building technical capacity is key to advancing effective and inclusive climate action. Our capacity building efforts focus on equipping individuals, institutions, and communities with the knowledge, skills, and practical tools needed to address the impacts of climate change, enhance resilience, and support sustainable development.

Recognizing the growing importance of market-based approaches and climate finance, ECAS has prioritized training on Carbon Markets, Emissions Trading, and Climate Finance Mechanisms to help African stakeholders engage meaningfully in global climate processes.

We have successfully conducted specialized trainings for policymakers, private sector actors, and development partners, focusing on unlocking opportunities under Article 6 of the Paris Agreement, strengthening Africa's participation in carbon markets, and enhancing access to climate finance for adaptation and mitigation.

CLIMATE CHANGE TRAININGS CONDUCTED

- 01 Carbon Markets and Trading Course, in Nanyuki, Kenya
- 02 Masterclass in Carbon Markets & Emissions Trading in Nairobi, Kenya.
- 03 Carbon Markets and Nature-Based Solutions in Naivasha, Kenya.
- 04 Climate Finance (Budgeting, Coding and Tracking) in Nairobi, Kenya for Gambian Delegates
- 05 Climate Resilient Infrastructure Development Training in Nairobi, Kenya for Rwandan Delegates
- 06 Masterclass in Climate Change (Adaptation, Mitigation, Finance and Technology Transfer)
- 07 Climate Negotiation Training Workshop
- 08 Climate Change (Adaptation, Mitigation, Finance, Technology Transfer, Policy and Legal Frameworks),
- 09 Masterclass in Carbon Markets & Emissions Trading in Nairobi, Kenya.
- 10 Enhancing Capacities of Policymakers and Practitioners on Development, Environment and Climate Change in Sub-Saharan Africa for
- 11 Natural Resource Management and Climate Change Resilience Training for community leaders in Embu and Tharaka Nithi Counties.
- 12 Climate Change Advocacy, Governance and Diplomacy for Young Climate Ambassadors
- 13 Introduction to Climate Change and Response Strategies in Kenya
- 14 Introduction to Climate Change Governance and Community Resilience for Makueni County CSO Climate Change Forum Members
- 15 Introduction to Climate Change Science and Adaptation Strategies Training for Kenyan Journalists

Our independent policy-oriented research program seeks to bridge generate data to influence policy and to strengthen the nexus between research- policy- practices and inform decisions on the most critical policy and project decisions of the day, from climate change, circular economy, energy, water, agriculture, forestry, land, and humanitarian sectors to researching business strategies, regulations, and technologies.

To ensure better-informed policy and business decisions we also disseminate research findings and cutting-edge proposals to cultivate better development and business solutions.

Our publications are widely shared and distributed to engage audiences across conventional and new multi-media platforms.

BREATHE CITIES PROJECT

BACKGROUND OF THE PROJECT

Air pollution is a major environmental and public health issue in Nairobi, causing around 2,500 premature deaths annually. Key pollution sources include vehicle emissions, industrial activities, open waste burning, and dust from construction. Despite existing environmental laws, the lack of comprehensive and enforceable air quality regulations has led to ineffective pollution control and rising health risks.

The Breathe Cities initiative, delivered by Clean Air Fund, C40 Cities, and Bloomberg Philanthropies is working with Nairobi City County to develop tailored air quality regulations aligned with national and international standards. These regulations aim to set clear pollution limits, establish monitoring systems, and strengthen enforcement. Implementing them is vital for improving public health, supporting sustainable urban development, and fostering a cleaner, greener Nairobi.

PROJECT SUMMARY

This project is developing air quality regulations for Nairobi City County, towards implementing the City's Air Quality Act 2022. These regulations will be based on national standards and existing national regulations for sectors like transportation, waste management, and industry.

To ensure effective application, the project has incorporated a training component for those responsible for implementing and enforcing the new regulations.

INTENDED OUTCOMES

- 01** Nairobi City County Government endorsed air quality regulations.
- 02** Officials of Nairobi City County Government have increased skills and knowledge to improve air quality through effectively implement and enforce the air quality regulations.

PROJECT ACTIVITIES

01

STAKEHOLDER MAPPING & CONSULTATION

Identify key actors and engage them in shaping Nairobi's air quality regulations through inclusive consultations.

02

DESKTOP REVIEW

Review existing policies, studies, and data to guide evidence-based regulations development.

03

TECHNICAL WRITESHOP

Collaborative session with experts to draft a practical and informed Air Quality Regulations

04

STAKEHOLDER VALIDATION AND FEEDBACK

Gather feedback from diverse stakeholders to refine and validate the Draft Air Quality Regulations

05

COUNTY LEADERSHIP ENGAGEMENT

Engage senior county officials to build support and align the Draft Air Quality Regulations with county priorities.

06

COUNTY ASSEMBLY ENDORSEMENT

Present the Draft Air Quality Regulations to the County Assembly for formal endorsement and policy backing.

07

DEVELOPING TRAINING MODULES

Create tailored training content for government officers, communities, and key stakeholders.

08

CAPACITY BUILDING WORKSHOP

Conduct training sessions to equip responsible parties with skills to implement air quality actions.

COMPLETED ACTIVITIES

► STAKEHOLDER MAPPING & CONSULTATION

Outcome: conducted 3 convenings

► DESKTOP REVIEW

Outcome: conducted 5 convenings

► TECHNICAL WRITESHOP

Outcome: conducted 5 convenings

► STAKEHOLDER FEEDBACK & VALIDATION

Outcome: conducted 5 convenings

► LEGAL EXPERT CONVENING

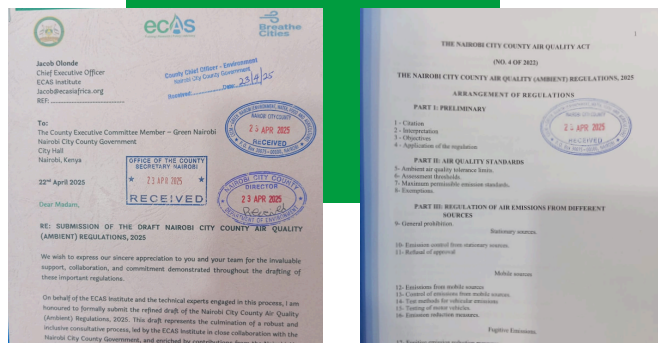

Conducted a session with legal experts

ONGOING ACTIVITIES

► COUNTY LEADERSHIP ENGAGEMENT

Outcome: successfully submitted the Draft Air Quality Regulations to the County leadership

► COUNTY ASSEMBLY ENDORSEMENT PROCESS

1. Drafting of the Air Quality Regulations (Completed)
2. Committee review: Activity - Upcoming Training for MCA's
3. Debates
4. Final Approval

PENDING ACTIVITIES

- DEVELOPING TRAINING MODULES
- CAPACITY BUILDING WORKSHOPS

MENTORSHIP AND GREEN SKILLS DEVELOPMENT

1. The Innovation Hub

Innovation Hub focuses on developing innovative climate-smart products, services and training in specific areas.

2. Capacity Building Seminars/Workshops

The innovation and training sessions are facilitated by esteemed ToTs, experts and practitioners drawn from academia, government, media, civil society and development partners.

3. Alumni Retreats and Exchange Programme

12 months after graduating from the hub, participants are invited back as part of a continuous development.

The program seeks to expose over 5000 young people (university students, young graduates, job seekers, and emerging entrepreneurs) to practical and innovative self/self-employability skills and opportunities that come with the environment, climate change, and energy-related fields.

The program is implemented through Training, debates, webinars, and match-making with innovative skills through environmentally-conscious apprenticeships, job placements, entrepreneurship training, and, business coaching.

KEY OBJECTIVES OF THE PROGRAMME

- a Support sustainable livelihoods through green entrepreneurship.
- b Empower individuals with practical, employable green skills.
- c Foster innovation in sectors such as agriculture, energy, and waste management.
- d Promote environmental stewardship through community-led action.
- e Align training efforts with the Sustainable Development Goals (SDGs), Africa Agenda 2063, and Kenya Vision 2030.
- F Bridge the skills gap for youth, refugees, and vulnerable populations.

EXPECTED OUTCOMES & IMPACT

Start and scale green businesses

Access new job opportunities in renewable energy, waste management, and sustainable farming

Lead environmental action in their communities

Train others, creating a multiplier effect for green capacity building

Reduce environmental degradation through eco-conscious practices

MONITORING, EVALUATION & LEARNING (MEL)

- ✓ Pre- and post-training assessments
- ✓ Impact tracking (e.g., employment created, waste diverted, revenue generated)
- ✓ Testimonials and case studies from beneficiaries
- ✓ Regular feedback loops to improve curriculum and delivery

TECHNICAL ADVISORY SUPPORT

Our principal objective is to help individuals, organizations, and other institutions remain relevant and competitive in the context of the dynamic business and development environment. We, therefore, aim to provide responsive, world-class, cutting-edge consultancy solutions to modern-day organizations. We specialize in short- and long-term consultancies.

- Research: Assessments, deep dive, baseline, feasibility, Scenario building, surveys
- Training: Short Courses, Professional Skills, Coaching, and Mentorship
- Events: Planning, facilitation, moderation, reporting & assessments
- Policy: Support, Analysis, Advocacy
- Business/ Organizations: Sustainability, Change Management, Leadership, Strategic Planning
- Projects: Design, Resources Mobilization, Contracting, M&E, learning
